

Conform stirilor date de " The Telegraph ", NOKIA va lansa saptamina viitoare Lumia 900.

Prin aceasta lansare Nokia va incepe tentativa sa de a sparge piața americană cu lansarea unui nou telefon-pilot pentru Windows, care ar putea fi numit Lumia 900, la CES in Las Vegas saptamana viitoare.

Noul dispozitiv va fi probabil similar cu modelul de top actual, Lumia 800, dar va avea un ecran mai mare, la 4.3 ", mai degrabă decât 3,7".

[Nokia](#) is hoping to build on the [positive critical reaction](#) that the Lumia 800 garnered when it was launched in London at the end of last year. Sources at retailers, however, say that while sales have risen, Nokia's marketing blitz, based around the slogan "The amazing everyday", has not provided the hoped for gear change.

[Microsoft](#) 's new Windows Phone platform uses an interface built on 'tiles' which both link to applications and display some information themselves. It is aimed in large part at users who are upgrading to a smartphone for the first time.
